Minimalist bollard design combines practical function with a clean aesthetic. The steel frame is available in 27 powder-coat or galvanised finishes.

Description	A minimalist steel frame delivers a modern bollard design that takes its cues from 20th century industrial design. The functional feel and light appearance of the Avenue bollard complements and sits within most public spaces to create a protective or architectural perimeter. Finishes include a steel frame in 27 powder-coat colors or a galvanised finish.
Made In	Australia
Dimensions	100mmW x 100mmD x 950mmH Base plate: 180mmW x 180mmD
Frame	Powder-coated steel or hot-dip galvanised steel. Optional 316 stainless steel in matt textured frame finish available on request.

Care Instructions

Powder-Coat

Carefully remove any loose surface deposits with a wet sponge or soft bristled brush.

Use a soft (non-abrasive) cloth or brush and a diluted solution of mild detergent and warm water.

Ensure surfaces are thoroughly rinsed with clean fresh water after cleaning to remove all residues.

Never use thinners, abrasive cleaning agents, alcohol-based, acid or alkali cleaning agents.

Hot-Dip Galvanised Steel

For general cleaning of bulk contaminants such as dirt and the like, ordinary laundry soaps can be satisfactorily used.

For more stubborn or larger areas, the use of a low-pressure wash (eg. a gurney gun) with just pure water or in conjunction with proprietary cleaning materials, such as car wash or truck wash, can be effective. It is important that the steel be washed down with fresh water after cleaning.

The cleaning treatment of the galvanising should be conservative at first and then if the situation demands, the treatment can become steadily more aggressive. Also, wherever some form of mechanical abrasion or “scrubbing” is required, the use of a hard, plastic bristle brush is recommended. Steel bristle brushes are not to be used since they will cause discolouration.

Mechanical methods of cleaning zinc surfaces can cause aesthetic issues. The “cleaned” areas are likely to contrast with adjacent untreated surfaces and may take a significant period of time to weather to a uniform colour. If aesthetics is a large concern, it is advisable to first test the cleaning method in an inconspicuous area in case the aesthetic effect is unappealing.

Customisable

As this item is made to order locally, custom lengths are available on request.

Additional Comments

Customise your bollard by adding a bright, high vis powder-coat to make them easier to spot in wet weather.
