Monolithic bench seating. Solid cantilevered form in precast concrete with stone aggregate grounds the design and provides an unexpected lightness.

Description The monolithic Ambra bench, designed by Alena Mocova for Metalco, features a simple, solid cantilevered form in precast concrete with stone aggregate that both grounds the design while providing an unexpected lightness. Stone aggregate options include white or grey granite and white or black marble for a touch of elegance. Featuring a brushed top and sandblasted sides for a textural contrast, the bench can be used as a subtle statement piece in many outdoor public spaces.

Made In Europe

Dimensions 1350mmW x 450mmD x 450mmH

Weight 327kg

Care Instructions

Precast Concrete

Cleaning

Remove any loose surface deposits with a brush.

Regularly wash the coating using a solution of warm water and non-abrasive, pH neutral detergent solution (with low wax content).

Thoroughly rinse the surfaces after cleaning to remove all residues. You can use a sponge, a soft bristle brush or pressure water cleaners. For pressure cleaners ensure you use cold or warm water and average pressure. Rinse after with fresh water and leave to dry.

Do not use abrasive sponges, discs, or brushes.

Do not use corrosive detergents, descaling agents, or acidic components (bleach, ammonia, vinegar, abrasive pastes).

For cleaning marks or solidified substances from the surface use slightly abrasive sponges for non-stick ceramic pans, accurately and lightly treat the parts to be cleaned as above. Please check with Botton + Gardiner for advice relating to cleaning special circumstances (i.e. stains from paint, acid, etc.) as required.

Maintenance

For surfaces prone to additional wear like that used for street furniture, regular treatment is recommended (at least every 2 years) with products containing high wax content. Evenly apply the product with a soft cloth and polish with a circular motion.

Avoid the products from being placed on surfaces subject to infiltrations or stagnant water puddles.

Additional Comments

Upon request, if the product allows it, it is possible to perform polishing operations.

The finished products are treated with a revitalizing varnish and, if requested, anti-graffiti treatment can be applied.
